WORK EXPERIENCE

Rossmon S.A.

Software development internship   Aug 2024 - Dec 2024

- **Developed and implemented automated features for a travel agency system**, streamlining manual processes previously handled by the finance team and significantly boosting overall productivity.
- **Optimized MSSQL queries**, achieving a 17% improvement in efficiency through comprehensive refactoring.
- **Integrated a robust translation feature into an agricultural system**, enabling seamless localization of both the administrative platform and the mobile app into German, Spanish, and English, with native-level accuracy.
- **Implemented new features for the company's job posting site**, enhancing the categorization and filtering of job listings, resulting in improved user experience and more efficient job search functionality.

EDUCATION

Colegio Universitario de Cartago

Associate of Technology (IT) - 9.0/10   January 2021 - December 2024

PROJECTS

Portfolio 🔗   December 2024 - January 2025

- Personalized online space to present my software development capabilities in a visually appealing and functional way.
- Fully responsive and optimized design.
- Built using **React.js** for a dynamic, interactive user experience, and deployed using **GitHub Pages** for easy access and visibility.
